 + 27 31 573 9000  + 27 31 563 0020  0861 001 084  info@sff.co.za  www.sff.co.za

We at **SFF** have put together a comprehensive range of installation tools & Accessories to facilitate the window film, paint protection and vinyl graphics application process. These tools are ideal for all professional & DIY installs.

Typically and for most jobs, you will require the following:

1. A glass scraper to prepare the glass prior to installation.
2. An application tool or squeegee.
3. A sharp retractable knife to trim any excess material after application
4. A spray bottle with a fine mist setting for emitting the application solution.

The "solution" mentioned above, is simply a few drops of washing liquid or baby soap, mixed with water. This makes the procedure of applying the film much easier, as the film will be easier to move around and adjust before the film dries in position.

This online store contains all the information you may need to know about our installation tools and for your convenience, a quick and easy method to purchase the tools you need.

Knives & Scraping Blades

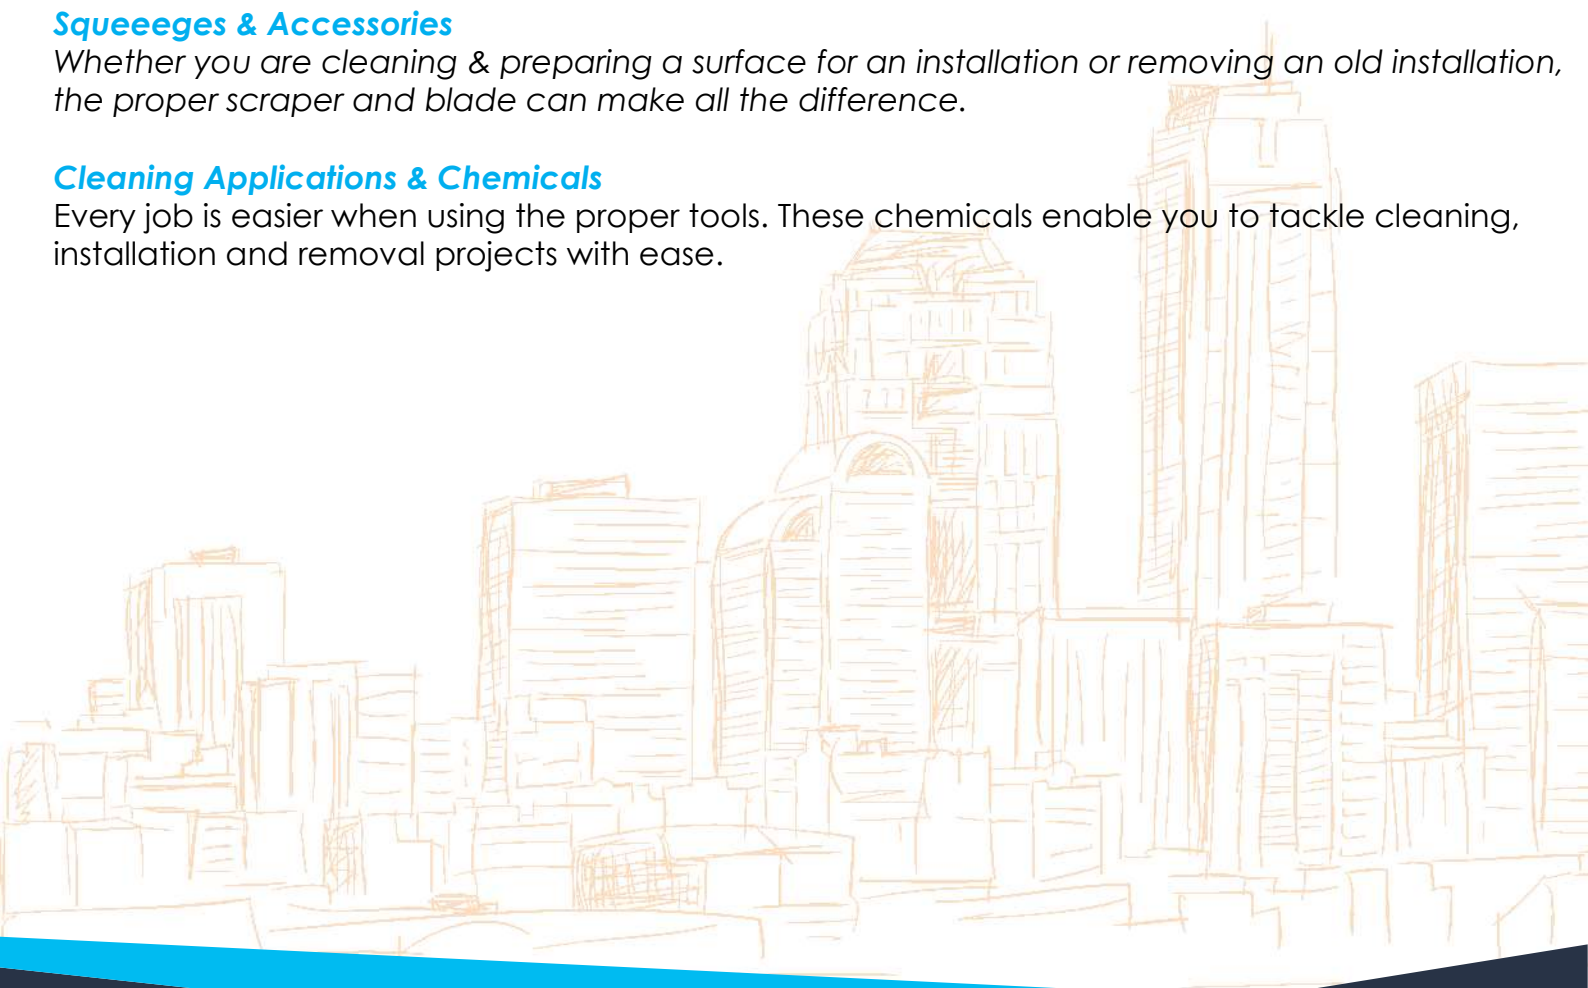

Easy-to-use installation tools - knives or cutters and razor blades gives the installer a best wrap and film cutting or trimming. Cutters and razor blades sold at SFF are the most professional for wrapping, tinting and weeding. We have all you need to get the job done.

Squeeeges & Accessories

Whether you are cleaning & preparing a surface for an installation or removing an old installation, the proper scraper and blade can make all the difference.

Cleaning Applications & Chemicals

Every job is easier when using the proper tools. These chemicals enable you to tackle cleaning, installation and removal projects with ease.

Olfa SVR-1 Silver Knife

Description:

The Olfa Silver has been an installer favourite for many years. Featuring a slim, stainless steel body, the Olfa SVR-1 feels like an extension of your hand. This knife also features an integrated blade snap tool. Cut with precision, and work effortlessly with thin materials including vinyl, window film, paint protection, wallpaper, shrink wrap, cardboard and caulking.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

Complimentary Tool:

Olfa Stainless Steel Blades

Super Cutter

Description:

The Super Cutter is a cheap effective knife, great for those that are always losing their knives. With the Super Cutter you can buy in bulk and never worry about losing one or leaving one in a car again. Perfect for film pattern cutting and trimming.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

Complimentary Tool:

Olfa Stainless Steel Blades

Performax Rite Cut Lite Duty Art Knife

Description:

The light Duty Art Knife is great for both professionals & amateurs alike. Useful for Paint Protection, Film installations, weeding vinyl, art work and hobby or craft projects.

Recommended Usage:

Automotive, Signage & Wallpaper Applications

Blade Aide/ Single Blade

Description:

Mini Scraper (Blade Aide) Single Blade. Perfect handle for any single edge razor blade. Holds either plastic or stainless steel blades.

Recommended Usage:

Automotive, Flat Glass Applications

Complimentary Tool:

Plastic Razor Blades, Single Edge Razor Blades

1" HD Retractable Razor Scraper

Description:

The All way retractable razor scraper gives you leverage for those tough scraping jobs. Featuring a retracting, three position blade allowing the blade to be stowed for safety, intermediate position for scraping and extended for blade changing. This scraper utilizes standard 1" single edge blades.

Recommended Usage:

Automotive, Flat Glass Applications

Complimentary Tool:

Single Edge Razor Blades

Olfa Stainless Steel Blades (10 packs)

Description:

Stainless steel snap-off blades for use in moist environments (wallpapering, vinyl, window films, etc.) where rust is concerned. 13 cutting edges per blade strip. Designed for superior sharpness and blade edge retention. Be sure that you are using stainless steel blades; they are less likely to scratch glass than carbon blades. The right combination of sharpness and durability have enabled these blades to outsell all competitive blades combined.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

Complimentary Tool:

Olfa SVR-1 Silver Knife, Supercutter

Single Edge Razor Blades

Description:

Single Edge Razor Replacement Blades 100 Pack. Steel back razor blades. Are idea replacements for the Blade Aid/ Single Blade and 1" HD Retractable Razor Scraper.

Recommended Usage:

Automotive, Flat Glass Applications

Complimentary Tool:

Blade Aid/ Single Blade, 1" HD Retractable Razor Scraper

Plastic Razor Blades (100)

Description:

Scrape until your hearts content and you wont scratch the glass. These plastic razor blades are very handy when you don't dare use a metal razor blade for fear of scratching the surface that you are scraping. These blades are also great for removing automotive decals or anywhere that might be susceptible to scratching or damage with a normal blade.

Recommended Usage:

Automotive, Flat Glass Applications

Complimentary Tool:

Blade Aid/ Single Blade

Lil'Chizler

Description:

The lil Chizler combines a small size, stiff material and beveled edges to make it a perfect tool for pressing out small crease marks and getting smaller air pockets to lay down. This tool is also ideal for removing decals, films or adhesive from sensitive areas when a razor blade might damage the surface.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

4" Gray Lidco Bondo Card

Description:

The 4" Lindco grey Bondo card is one of the most versatile tools for pushing out moisture from all types of window film, vinyl graphics or PPF installations. These cards are designed with two parallel ridges or bumps down the center to give it a secure slip-resistant grip and gentle rounded corners to prevent scratches. This card is slightly harder than the white and orange bondo's.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

3M Blue Bondo Card

Description:

The 3M Blue Bondo card is one of the most versatile tools for pushing out moisture from all types of window film, vinyl graphics or PPF installations. These cards are designed with two parallel ridges or bumps down the center to give it a secure slip-resistant grip and gentle rounded corners to prevent scratches. The Blue card is more pliable than the 3M Gold Card and harder than the grey card.

Complimentary Tool:

Automotive, Flat Glass, Signage & Wallpaper Applications

3M Gold Bondo Card

Description:

The 3M Gold Bondo card is one of the most versatile tools for pushing out moisture from all types of window film, vinyl graphics or PPF installations. These cards are designed with two parallel ridges or bumps down the center to give it a secure slip-resistant grip and gentle rounded corners to prevent scratches. The gold card is the middle of the range in hardness making it the most popular bondo card. It is also less pliable than the 3M Blue Bondo Card.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

4" Lidco Orange Bondo (Square Corners)

Description:

The 4" Square Corner Lidco Orange Bondo can be used as an installation squeegee or wrap it in a soft towel to bump edges dry. Useful for either window film paint protection film or automotive installation. This Bondo has square corners unlike the traditional 4" Lidco Orange Bondo.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

Black Bondo

Description:

The choice for maximum water removal from automotive or flat glass installations. This Bondo is favourite for those who install security.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

SFF Gold Card

Description:

The SFF Gold Bondo card is one of the most versatile tools for pushing out moisture from all types of window film, vinylgraphics or PPF installations. These cards are designed with two parallel ridges or bumps down the center to give it a secure slip-resistant grip and gentle rounded corners to prevent scratches. The gold card is hardest raking it one of the most popular bondo cards.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

4" Lidco White Bondo Card With Felt Edge

Description:

The marriage of a traditional 4" Bondo type card with one edge covered in felt. Combining an installer favoured design with a felt edge to make the perfect vinyl sign, vinyl graphic and vehicle wrap installation tool. Saves time and money by frequently eliminating the need to "wrap" a squeegee in a towel. This makes this tool much less app to scratch the film during installation

Recommended Usage:

Automotive, Signage & Wallpaper Applications

3M Wet or Dry Rubber Squeegee

Description:

This flexible, rubber squeegee from 3M makes a great tool for paint protection film, vinyl graphic and vehicle wrap installations. It's smaller size (3" x 2") enables you to get this tool into tight areas that are inaccessible with larger installation tools. Can be used for wet and dry applications. Perfect to use for those softer paint protection films that scratch easily during installation.

Recommended Usage:

Automotive, Signage & Wallpaper Applications

Mactac Soft Felt Squeegee

Description:

The Mactac Felt Squeegee is rapidly becoming an installer favourite in all the markets we service. This versatile squeegee is being used to heat shrink high performance window films to help prevent distortion and adhesive smear that can be a problem with harder installation cards when used with these films. This squeegee is also ideal for vinyl graphic, vehicle wrap and paint protection film installations as it glides easily over the material and prevents scratching and tearing.

Recommended Usage:

Automotive, Signage & Wallpaper Applications

Black Smoothie Turbo Squeegee

Description:

The Black Smoothie Squeegee is a terrific tool for cleaning the glass before window film installation. The softness of the squeegee blade allows it to perfectly contour to the glass surface swiping away any contaminants. While some use this squeegee for laying down window film, it is not really designed for this use as it will leave much of the mounting solution trapped between the film and the glass. Can be used for paint protection installations as well.

Recommended Usage:

Automotive, Flat Glass Applications

3.5" Green Turbo

Description:

The Green Turbo is a relatively softer durometer turbo which is great for installing paint protection films and vinyl applications. The Green Turbo has the consistency of the Yellow Turbo but the flexibility of the Black Smoothie.

Recommended Usage:

Automotive, Signage & Wallpaper Applications

Blue Max (Bevelled Blade)

Description:

Blue Max Squeegee Blades has been the popular choice for maximum water removal from your automotive or flat glass installations for years. The Blue Max squeegee blades are the industry standard because of their ability to glide over the film easily while extracting a tremendous amount of slip solution. These blades can be used on all types of window films for automotive, residential, commercial, security and anti-graffiti applications.

Recommended Usage:

Automotive, Flat Glass Applications

Complimentary Tool:

Pro Handle Squeegee

Gold EZ Reach - Original

Description:

The original, 3 corner, EZ Reach tools have become industry staples. After years of installers cutting Teflon cards in half in an effort to get into corners that a full card could not reach, the EZ Reach tool was developed with this same concept in mind. With smooth edges and a precision point, this tool will enable you to lay down film and push out creases in the tightest areas.

Recommended Usage:

Automotive Installation

Yellow Tri-Edge X Hard Card

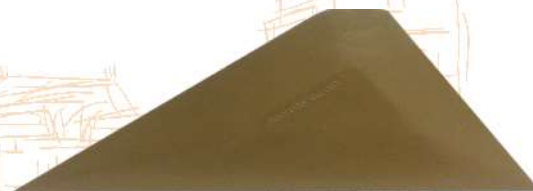

Description:

Tri-Edge is pleased to announce the introduction of the larger Tri-Edge X. The angles have been re-calculated and extended into a bigger tool. Now at a full 6" wide across the bottom, the new Tri-Edge X has all the durability and quality of the original Tri-Edge tool, but it has been made larger to make even those deep gaskets and hard to reach spots more accessible. The Tri-Edge X Yellow is the medium hardness level in the Tri-Edge X family. The Tri-Edge X Yellow is perfect for higher performance and thicker films when you want a slightly stiffer hard card to work with.

Recommended Usage:

Automotive Installation

Gold Ez Reach - Ultra

Description:

If you liked the original EZ Reach, you're going to love Ultra – it's exactly the same except we've removed the hole to make it stronger and trimmed the top down to give installers yet another handy angle to work with. With EZ Reach Ultra, there's no need for you to cut down a Teflon hard card to get the tool you want. EZ Reach Ultra fits the bill. This triangular card, with its flat edges is the companion to our Contour tools. Designed specifically to get at the corners of quarter glass windows, you'll also reach for it again and again to put down those little corners of film in hard to access areas.

Recommended Usage:

Automotive Installation

Smart Card Mango

Description:

Smart Cards are a contemporary version of the traditional hard card...but better, because they are 25% wider and have a comfortable grip and thin edge. This is THE New & Improved Teflon hard card. Great for sliding under gaskets and seals. Use Smart Card anywhere you'd use hard card squeegees.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

White Knight

Description:

White Knight Tool. One of the stiffest hard cards available. Narrow handle fits in your hand while allowing you to reach into corners.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

Yellow Shuttle

Description:

The YELLOW SHUTTLE is a great tool to get behind tight window gaskets or those pesky third break lights. With just the right length at 10" overall and a decent amount of flex this tool works so well you will think it was designed by the folks at NASA.

Recommended Usage:

Automotive Installation

Conquistador

Description:

The Conquistador is the original corner reach tool. Features a soft squeegee blade along one edge and point hard card tips on the ends making it a versatile staple to any tool kit. It has a Stiffer body and featured in a high visibility colour so you won't leave your favourite tool in a car. A true must have for any serious tinter.

Recommended Usage:

Automotive Installation

White 5 Way Tool

Description:

Don't be caught without a versatile 5-Way Tool in your tool box. These tools measure 10" wide and can be used to give you an ideal trim guide for flat glass applications leaving a perfect 1/16"-1/8" micro-edge. You can also wrap the edge in a paper towel and use this tool to "bump" the edges of the installed film to get that last bit of mounting solution out. Finally, this handy tool features a variety of angles and shapes that can be used as a template for cutting.

Recommended Usage:

Flat Glass Applications

Slim Foot

Description:

Modelled after the Big Foot Squeegee, Slim Foot has a soft rubber handle with the same long 15 inch reach it has a slender design than can reach into tighter openings. This no rib squeegee helps reach behind brake lights and has a vinyl grip for secure handling.

Recommended Usage:

Automotive Flat Glass Installation

Automotive Bulldozer Squeegee

Description:

The automotive Bulldozer Squeegee is designed to give you all the benefits of longer handled tools like the Big Foot and Slim Foot, but with the added benefit of a rubber edge squeegee blade. The rubber squeegee blade allows the Bulldozer to conform to curved glass surfaces better enabling the installer to more easily lay the window film down in curved areas. It allows you to get to those hard to reach areas, such as behind speakers, brake lights, low angles and rear windows. The Bulldozer is 15" in length and has a 6" rubber squeegee blade on the end.

Recommended Usage:

Automotive Installation

Yellow Quick Foot

Description:

When you need a stiff squeegee with a handle for jobs that require medium reach, Quick Foot is the perfect "in-between" tool. Great automotive tool to get into those hard to reach spots difficult spots that drive you crazy.

Recommended Usage:

Automotive Installation

Gasket Push Stick

Description:

Gasket Push Sticks are used to push down the gasket lips on roll down windows allowing the window film to be installed below the gasket line. The long and thin design can also be used to focus pressure and push out small fingers / bubbles deep in a rear deck, windshield area or very tight corners in port windows.

Recommended Usage:

Automotive Installation

Gator Blade 1

Description:

GATOR BLADE 1 features arched blades on opposite ends. This blade design allows more scraping pressure for around rear defrosters and for adhesive removal on surfaces where metallic razor blades would scratch surfaces, such as stainless steel and painted surfaces. The GATOR BLADE 1 contours to the shape of auto glass so that it efficiently removes debris & old adhesive. It also aides in pushing down fingers and removing creases.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

Black Gator Blade

Description:

Black Gator Blade features two opposing arched blades. The narrower blade allows more scraping pressure for around rear defrosters and for adhesive removal on surfaces where metallic razor blades would scratch surfaces such as stainless steel and painted surfaces. Great for pushing down flutes.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Application

Pro Squeegee Handle

Description:

The Pro Handle is an industry standard. The stainless steel design features a fast lock lever for quick channel swapping, and an ergonomic no-slip grip for a secure hold. Can be fitted with either Pro Replacement Blades for cleaning or Blue Max Inserts for film installations.

Recommended Usage:

Automotive, Flat Glass Applications

Complimentary Tool:

Pro Blade with Channel 6", Blue Max

Pro Handle Squeegee With Clear max

Description:

The 6" Pro Handle Squeegee with Clear Max (without angle) is designed specifically for flat glass and safety film installations. It easily accommodates handle extensions for a quicker installations.

Recommended Usage:

Flat Glass Application

Complimentary Tool:

Clear Max

Pro Blade With Channel 6"

Description:

6" Pro Blade with metal channel for window cleaning is built to last. Great for initial prep work or slip the black blade out and put a 6" Blue Max Insert in and you're ready to install window film... even the thickest safety films. The softness of the black squeegee blade makes this combination perfect for a pre-installation cleaning of the glass, or a post installation final clean-up to remove streaks or smudges.

Recommended Usage:

Automotive, Flat Glass Applications

Complimentary Tool:

Pro Replacement Squeegee Blade, Squeegee Without Angle, Pro Squeegee Handle

Pro Replacement Squeegee Blade

Description:

Replacement blades for squeegee channel, used for window cleaning and installation.

This squeegee material is perfect for a pre-installation cleaning of the glass, or a post installation final clean-up to remove and streaks or smudges. (1 Metre Rubber)

Recommended Usage:

Automotive, Flat Glass Applications

Complimentary Tool:

Pro Blade

Curved White Tool

Description:

A contemporary version of the traditional hard card, but better, because they are 25% wider and have a comfortable grip and thin edge.

Recommended Usage:

Automotive Installation

Tint-Off Window Tint Removal Solution

Description:

Specially formulated for the window film industry, TINT-OFF lets you remove window film without the hassles of regular window film removers. No messy dyes to stain interiors. No toxic ammonia to burn your eyes. It's so safe; you can use it inside the vehicle for quick and easy turn-around times. Worried about damaging rear window demisters? TINT-OFF is so gentle it removes the film without scraping, minimizing risk to delicate demisters.

Recommended Usage:

Automotive, Flat Glass Installation

Dirt-Off Window Film Solution

Description:

Dirt-Off is a great product for prepping the glass prior to window film applications. This not only cleans the surface of the glass, but helps to remove contaminants from the pores of the glass to give you a perfectly prepped surface. In addition, Dirt-Off can be used as a mounting solution for window films with Clear Distortion Free adhesive systems. The Dirt-Off will enable you to get the film mounted on the glass and expedite the adhesive activation. This is crucial with a dry adhesive window film when the temperature either very hot or very cold.

Recommended Usage:

Automotive, Flat Glass Installation

Performax Installation Gel

Description:

Performax Gel is a premixed Paint Protection installation aid for professional paint protection installers. Simply pour into a standard spray bottle and apply a generous amount to the working surface. Performax Gel does not need to be diluted, but can be, depending upon the amount of slip vs grip that your installation demands. This product is great when installing a large piece like a whole hood.

Recommended Usage:

Automotive Installation

Paint Cleaning Clay

Description:

How clean you think your paint is, there are still contaminants stuck on the paint that you need to remove before waxing or polishing your paint. Paint Cleaning Clay leaves behind an ultra-smooth surface that will make your wax adhere better and last longer. It also makes the wax much easier to buff out. Paint Cleaning Clay is safe for all paint and also works great on glass to get it squeaky clean.

Recommended Usage:

Automotive Installation

Matrix Magic

Description:

The easy to use adhesive will give you a bit more stick on Dot Matrix. Fill in gaps left between dots and film allowing you to say goodbye to patch Dot Matrix areas Forever.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

Paper Towels

Description:

Fast absorbing paper towels for the professional installer.

Recommended Usage:

Automotive, Flat Glass, Signage & Wallpaper Applications

Do Not Roll Down Stickers (500 Count)

Description:

Do Not Roll Down Stickers are used to inform car owner or car driver not to roll down the windows during the film curing process. A must for every professional tinter.

Recommended Usage:

Automotive Installation

Stainless Steel Tweezers Curved Tip

Description:

Stainless Steel Tweezers are incredibly handy for weeding film and vinyl. These "CURVED" tweezers are even more effective than our plain "straight" tweezers. Lift up the edge of installed film without leaving a finger print or any of your DNA behind.

Recommended Usage:

Signage & Wallpaper Applications

Ryobi 2000W Heat Gun

Description:

A great tool for Automotive Installers to have. Perfect for helping during the installation & stripping of old Vehicle wraps, Paint Protection and Window Film. The Variable temperature function ensures perfect care is given to any vehicle.

Recommended Usage:

Automotive Installation
